

Experiment 6

Create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the students, course, present, Absent, course attendance, OD request, grade, attendance percentage, etc

Aim

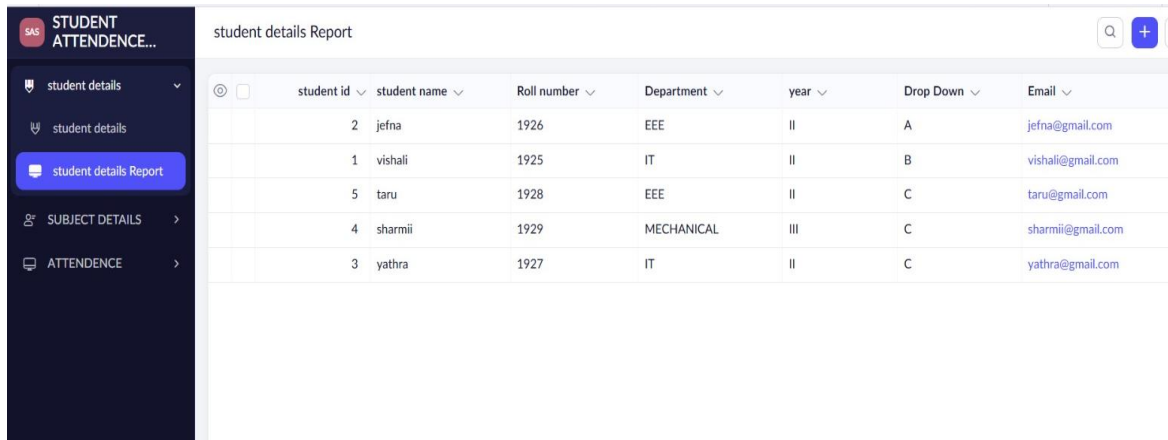

To create a simple cloud-based **Student Attendance System** using **Zoho Creator** and demonstrate the **Software as a Service (SaaS)** model by managing student attendance, course details, OD requests, grades, and attendance percentage.

Procedure

1. Log in to **Zoho Creator** and create a new application named **Student Attendance System**.
2. Create a **Student Details** form with fields such as Student ID, Student Name, Register Number, Department, and Year.
3. Create a **Course Details** form with fields such as Course ID, Course Name, Faculty Name, and Semester.
4. Create an **Attendance Details** form with fields such as Student Name, Course, Attendance Date, Attendance Status, and Course Attendance.
5. Set the **Attendance Status** field with options **Present** and **Absent**.
6. Create an **OD Request** form with fields such as Student Name, Course, OD Date, Reason, and OD Status.
7. Add a **Grade** field to record the student's grade for the respective course.
8. Add an **Attendance Percentage** field to record the percentage of attendance.
9. Use **Lookup** fields to connect the student and course details with the attendance records.
10. Save the forms and create the corresponding reports.
11. Enter sample student, course, attendance, OD, and grade details into the application.
12. Verify the entered records and attendance percentage in the reports.
13. Access the application through a web browser to demonstrate the **SaaS** model.

Ouput

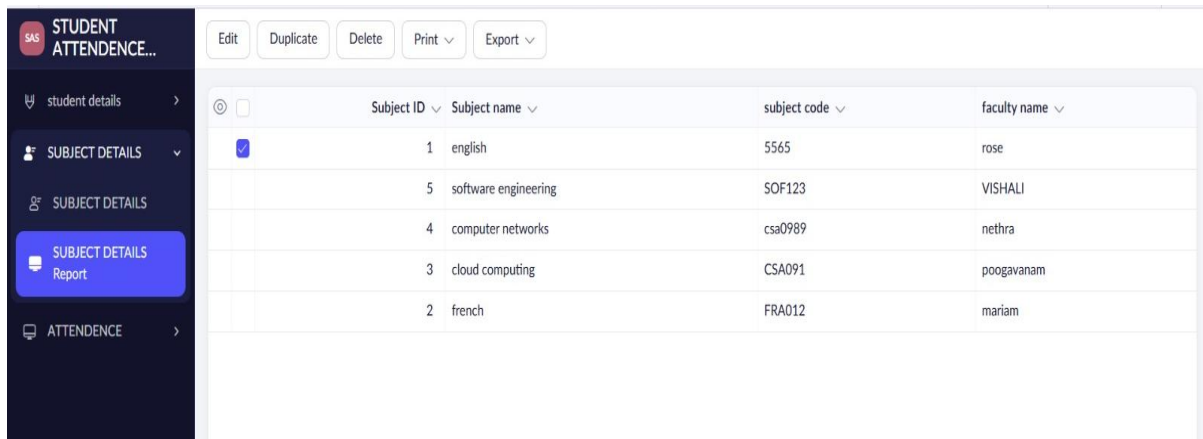

Student details:

The screenshot shows the 'STUDENT ATTENDANCE...' application interface. On the left is a dark sidebar with navigation options: 'student details', 'student details', 'student details Report' (highlighted in blue), 'SUBJECT DETAILS', and 'ATTENDANCE'. The main area displays the 'student details Report' with a table of student information. The table has columns for student id, student name, Roll number, Department, year, Drop Down, and Email. There are 5 rows of data.

student id	student name	Roll number	Department	year	Drop Down	Email
2	jefna	1926	EEE	II	A	jefna@gmail.com
1	vishali	1925	IT	II	B	vishali@gmail.com
5	taru	1928	EEE	II	C	taru@gmail.com
4	sharmii	1929	MECHANICAL	III	C	sharmii@gmail.com
3	yathra	1927	IT	II	C	yathra@gmail.com

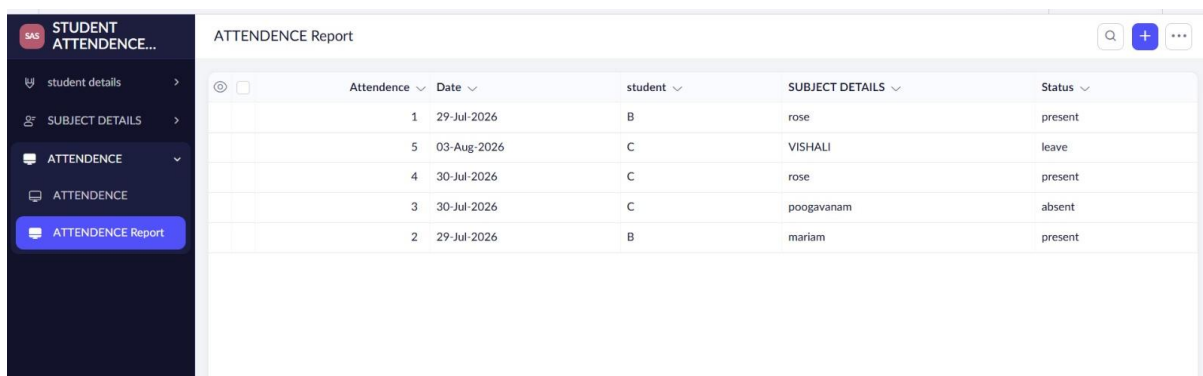

Subject details:

The screenshot shows the 'STUDENT ATTENDANCE...' application interface. On the left is a dark sidebar with navigation options: 'student details', 'SUBJECT DETAILS' (highlighted in blue), 'SUBJECT DETAILS', 'SUBJECT DETAILS Report' (highlighted in blue), and 'ATTENDANCE'. The main area displays the 'SUBJECT DETAILS Report' with a table of subject information. The table has columns for Subject ID, Subject name, subject code, and faculty name. There are 5 rows of data. Above the table are buttons for 'Edit', 'Duplicate', 'Delete', 'Print', and 'Export'.

Subject ID	Subject name	subject code	faculty name
1	english	5565	rose
5	software engineering	SOF123	VISHALI
4	computer networks	csa0989	nethra
3	cloud computing	CSA091	poogavanam
2	french	FRA012	mariam

Attendance:

The screenshot shows the 'STUDENT ATTENDANCE...' application interface. On the left is a dark sidebar with navigation options: 'student details', 'SUBJECT DETAILS', 'ATTENDANCE' (highlighted in blue), 'ATTENDANCE', and 'ATTENDANCE Report' (highlighted in blue). The main area displays the 'ATTENDANCE Report' with a table of attendance information. The table has columns for Attendance, Date, student, SUBJECT DETAILS, and Status. There are 5 rows of data.

Attendance	Date	student	SUBJECT DETAILS	Status
1	29-Jul-2026	B	rose	present
5	03-Aug-2026	C	VISHALI	leave
4	30-Jul-2026	C	rose	present
3	30-Jul-2026	C	poogavanam	absent
2	29-Jul-2026	B	mariam	present

Result

Thus, a cloud-based **Student Attendance System** was successfully created using **Zoho Creator**. The application manages student names, courses, present/absent status, course attendance, OD requests, grades, and attendance percentage through the cloud, thereby demonstrating the **Software as a Service (SaaS)** model.
