

Experiment - 2

Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS.

Aim: To create a simple **Flight Reservation System** using **Zoho Creator** (Cloud Service Provider) and demonstrate the **Software as a Service (SaaS)** model by storing and accessing reservation data through the cloud.

Procedure:

Step 1: Open a web browser and sign in to **Zoho Creator** using a valid Zoho account.

Step 2: Click **Create New Application** and choose **Blank Application (From Scratch)**.

Step 3: Enter the application name as **Flight Reservation System** and click **Create**.

Step 4: Create a form named **Passenger Details**.

Step 5: Add the necessary fields to each form according to the system requirements.

Step 6: Configure appropriate field types such as text fields, date fields, dropdowns, lookup fields, and auto-number fields wherever required.

Step 7: Save the forms and allow Zoho Creator to generate reports automatically.

Step 8: Enter sample records into the application.

Step 9: Verify that the entered information is stored and displayed correctly in the generated reports.

Step 10: Access the application through a web browser to confirm that it is available online as a cloud-based application.

Output:

PASSANGER DETAILS:

The screenshot displays the Zoho Creator application interface for the 'Flight reservation ssystem'. The top navigation bar includes the application name, a trial expiration notice ('Trial expires in 1 day'), and links for 'Upgrade', 'Edit this application', and 'Help'. The left sidebar contains a menu with 'Passanger details' (selected), 'Passanger details Report', 'Flight Details', and 'Reservation Form'. The main content area shows a table titled 'Passanger details Report' with the following data:

Full Name	Email	Address	aadhar card	Passport size
Vishali	vishlail@gmail.com	wgdhwbsjd, dshbhs, Tamilnadu, 6295673, Afghanistan	Pro_2.png	Screenshot 10_214334.p
