

Experiment 5

Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS.

Aim

To create a simple cloud-based **Hospital Management System** using **Zoho Creator** and demonstrate **Software as a Service (SaaS)** by managing patient, doctor, and appointment details through a cloud platform.

Procedure

1. Log in to **Zoho Creator** using a valid user account.
2. Create a new application and name it **Hospital Management System**.
3. Create a **Patient Details** form with fields such as Patient ID, Patient Name, Age, Gender, Phone Number, Address, Blood Group, and Disease.
4. Create a **Doctor Details** form with fields such as Doctor ID, Doctor Name, Specialization, Phone Number, Email, and Consultation Fee.
5. Create an **Appointment Details** form with fields such as Appointment ID, Patient, Doctor, Appointment Date, Appointment Time, and Appointment Status.
6. Add **Lookup** fields in the Appointment Details form to select the required patient and doctor from their respective forms.
7. Save all the forms and create the corresponding reports.
8. Enter sample patient, doctor, and appointment details into the application.
9. Verify the entered records in the respective reports.
10. Access the application through a web browser to demonstrate that the Hospital Management System is available as a cloud-based SaaS application.

Book reservation:

The screenshot displays the 'Library Book Reservation System' interface. On the left is a dark sidebar with navigation options: 'Student Details', 'Book Details', 'Book Reservation', and a highlighted 'Book Reservation Report' button. The main area is titled 'Book Reservation Report' and contains a table with the following data:

		Reservation ID	Student Details	Book Details	Reservation Date	Return Date	Reservation Status
		3	1925872462	9780199462964	11-Aug-2026	13-Aug-2026	Cancelled
		2	192875436	9780134610993	27-Jul-2026	31-Jul-2026	Returned
		1	192538728	9780133387520	04-Aug-2026	07-Aug-2026	Reserved

Result

Thus, a cloud-based **Hospital Management System** was successfully created using **Zoho Creator**. The application manages patient, doctor, and appointment details through the cloud, thereby successfully demonstrating the **Software as a Service (SaaS)** model.
