

EXPERIMENT 3

Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS.

Aim

To create a cloud-based **Property Buying and Rental System** using **Zoho Creator** and demonstrate the **Software as a Service (SaaS)** model.

Procedure

1. Log in to **Zoho Creator** using a valid user account.
2. Create a new application and name it **Property Buying and Rental System**.
3. Create an **Owner Details** form and add the required fields to store owner information.
4. Create a **Property Details** form and add the required fields to maintain property information.
5. Create a **Customer Details** form and add the required fields to store customer information.
6. Create a **Property Booking** form to record property buying and rental details.
7. Configure **Lookup** fields in the Property Details form to link the owner details and in the Property Booking form to link the customer and property details.
8. Save all the forms and allow Zoho Creator to generate the corresponding reports.
9. Enter sample owner, property, customer, and booking records into the application.
10. Verify that all records are stored correctly and displayed in the reports.
11. Access the application through a web browser to demonstrate that it is available as a cloud-based Software as a Service (SaaS).

Rohini	1	Female	+9147952628736	rohini@gmail.com	uhuijbnm, Kanyakumari, Tamil nadu, 6743223, India

Property Booking:

Booking Type	Auto Number	Customer Details	Property Details	Booking Date	Payment Status	Booking Status
Rent	3	3	1	07-Jul-2026	Paid	Confirmed
Buy	2	1	3	01-Aug-2026	Paid	Cancelled
Buy	1	2	2	31-Jul-2026	Paid	Confirmed

Result

Thus, a cloud-based **Property Buying and Rental System** was successfully created using **Zoho Creator**. The application stores owner, property, customer, and booking details in the cloud and can be accessed through a web browser, thereby demonstrating the **Software as a Service (SaaS)** model.
