

Experiment – 4

Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

Aim

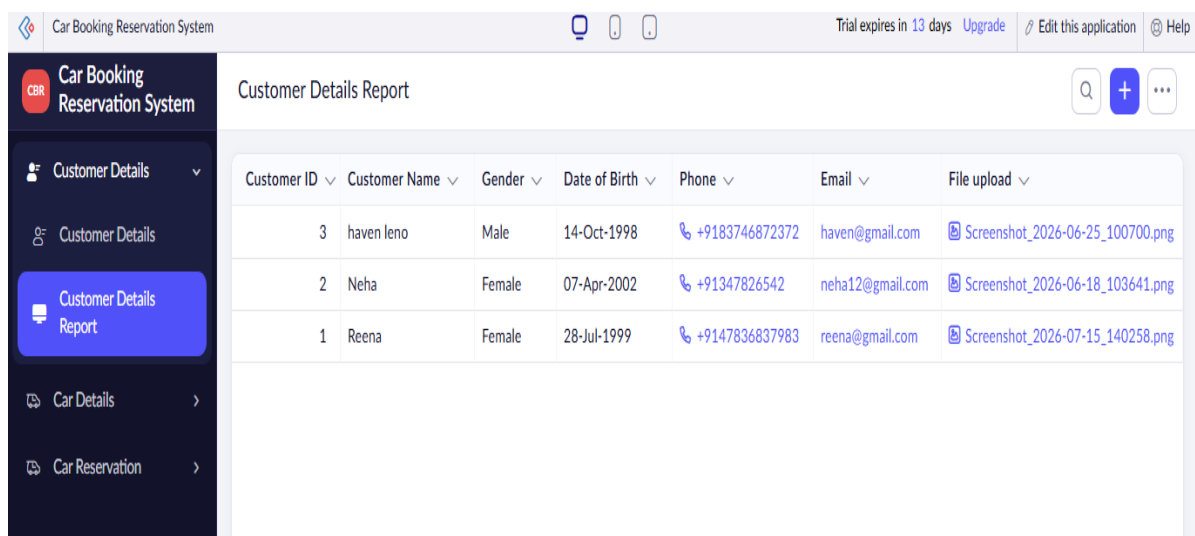

To create a cloud-based **Car Booking Reservation System** using **Zoho Creator** and demonstrate the **Software as a Service (SaaS)** model.

Procedure

1. Log in to **Zoho Creator** using a valid user account.
2. Create a new application and name it **Car Booking Reservation System**.
3. Create a **Customer Details** form and add the required fields to store customer information.
4. Create a **Car Details** form and add the required fields to maintain car information.
5. Create a **Car Reservation** form to record car booking and reservation details.
6. Configure **Lookup** fields in the Car Reservation form to link the customer details and car details.
7. Save all the forms and allow Zoho Creator to generate the corresponding reports.
8. Enter sample customer, car, and reservation records into the application.
9. Verify that all records are stored correctly and displayed in the reports.
10. Access the application through a web browser to demonstrate that it is available as a cloud-based Software as a Service (SaaS).

Output

Customer Details:

The screenshot displays the Zoho Creator interface for the 'Car Booking Reservation System'. On the left is a dark sidebar with a menu containing 'Customer Details', 'Customer Details Report' (highlighted in blue), 'Car Details', and 'Car Reservation'. The main area is titled 'Customer Details Report' and contains a table with the following data:

Customer ID	Customer Name	Gender	Date of Birth	Phone	Email	File upload
3	haven leno	Male	14-Oct-1998	+9183746872372	haven@gmail.com	Screenshot_2026-06-25_100700.png
2	Neha	Female	07-Apr-2002	+91347826542	neha12@gmail.com	Screenshot_2026-06-18_103641.png
1	Reena	Female	28-Jul-1999	+9147836837983	reena@gmail.com	Screenshot_2026-07-15_140258.png

Result

Thus, a cloud-based **Car Booking Reservation System** was successfully created using **Zoho Creator**. The application stores customer, car, and reservation details in the cloud and can be accessed through a web browser, thereby demonstrating the **Software as a Service (SaaS)** model.
